#nmap <staefp>

The 1655 ports scanned but not shown they are in state: closed

Port State Service  
21/tcp open ftp  
22/tcp open ssh  
25/tcp open smtp  
111/tcp open rpcbind

that's it.

John O'Loughlin <[j.oloughlin@xxxxxxxxxx](mailto:j.oloughlin@xxxxxxxxxx)> wrote:

thanks so much for your attention!

No problem.

what is the name of the server?

btw, you *\*will\** need some firewall rules.

also, can you give me the output of:

nmap localhost (if you have nmap installed)

John

John O'Loughlin wrote:

Can you:

1. tell me the name of the server, so I can 'take a look'

Re: Fwd: Re: how to setup ftp server in red hat enterprise level 5

2. tell me the output of iptables -L -n

Regards  
John

i am based in singapore. i still cannot do ftp even i started vsftpd. by the way  
firewall is not enabled in the server.

Note: forwarded message attached.
