Hello,

unable to create any directory that uses numbers as the directory name

```
root@server [~]# mkdir 123
mkdir: cannot create directory `123': No such file or directory
root@server [~]# mkdir 0
mkdir: cannot create directory `0': No such file or directory
```

Filesystem is not in readonly mode because I can create dir with a mix

of

numbers and alphabets.

```
root@server [~]# mkdir 1ab
root@server [~]#
```

Please advise.

```
[root@mach2 ~]# mkdir 123
```

Re: unable to create any directory that uses numbers as the directory name

Re: unable to create any directory that uses numbers as the directory name

```
[root@mach2 ~]# ls -ld 123
drwx----- 2 root root 4096 Sep 20 09:09 123
[root@mach2 ~]#
```

I can. Not sure why you cannot.
