

Adaptec SCSI RAID 2000S

Source: <http://linux.derkeiler.com/Mailing-Lists/RedHat/2007-10/msg00187.html>

I urgently need advice on this: I need to install RHEL5 on a server that is probably about 4 years old. It contains an Adaptec SCSI RAID 2000S adapter, and there is no driver available that I can track down on short notice (and none included on the RHEL5 discs). Anaconda does not detect any disks on the server during installation.

Anyone know what my best bet is to get around this, or where to find a driver that will work?

Thanks very much.

Johan
