Yes you can do so...

Try this:

```
ps aux | awk '{ print $8 " " $2 }' | grep -w Z;
```

Kill them one by one.. e.g kill -9 4104

or else direct them into a file and place this command in a for or while loop..

Hope that helps!

Hi All,

I was wondering if i can kill all the zombie process in my server in one shot.
