It might be firewalling as well.

Quoting "Florez, Nestor" <[NFlorez@xxxxxxxxxx](mailto:NFlorez@xxxxxxxxxx)>:

I want to try that because I am having problems accessing webmin on port 10000 from another server and I think it might SELinux that is causing the problem.

Thanks,

Néstor :-)

How do I disable and enable Selinux?

:-)

setenforce command ....

setenforce 0  
setenforce 1
