

Prelink dependency cycle

Hello,

Prelink is giving me the following error:

```
sudo /usr/sbin/prelink /usr/bin/less
/usr/sbin/prelink: /usr/lib/libncurses.so.5.3 has dependency cycle
```

Does anyone know how to resolve this? I will continue to look on the 'net, but I have found no real answer as to how to resolve the problem. Running prelink with the '-a' or '-f' options made no difference. The '-u' option told me:

```
/usr/sbin/prelink: /usr/bin/less does not have .gnu.prelink_undo
section
```

so that didn't work. I tried forcing prelink (/var/lib/misc/prelink.force) and running the /etc/cron.daily 'prelink' job, but again no difference.

This is an RHEL3 system (Red Hat Enterprise Linux ES release 3 (Taroon Update 9)).

Thanks,

John.
