Prelink is giving me the following error:

```
sudo /usr/sbin/prelink /usr/bin/less
/usr/sbin/prelink: /usr/lib/libncurses.so.5.3 has dependency cycle
```

Does anyone know how to resolve this?

Anyone know anything about this also:

```
sudo /usr/sbin/prelink /usr/bin/less
/usr/sbin/prelink: /usr/lib/libncursesw.so.5.4: .debug_loc adjusting
unfinished
```

This was on an RHEL4 system. Again, running prelink with various options made no difference, and there seems to be very little on the 'net about it.

Thanks,

John.
