Hi all

Wonder if any one can help. We have tried to get RH21. AS installed on an IBM HS20 Blade – in installs but we can't get the network to work.

We have tried various combinations of broadcom BCM5700 and tg3 drivers, etc etc but no joy.

We are installing RH 2.1 AS Update 6 (and even tried to manually load updates...) but still no joy

Any help much appreciated

P
