I would love to run red hat but need to run it on a laptop. Is there any effort to get red hat certified on laptops as it is on desktops and workstations? I don't need pre-installed. Thanks.

HP has certified the nc8000, nw8000, and notebooks certified for Red Hat 4. Cf.

Other vendors may as well. Have you checked their pages?

And do you need Red Hat to be certified or simply to run? If the latter, choose the laptop you prefer, then browse the internet to see if people or running Red Hat on them and have issues with them or not. I've been running linux (mostly Red Hat and Fedora) on Dell and HP laptops since 2001.

Kind regards,

Herta
