I have an RPM if you want, but it's for x86\_64 bit machines. I can send you the SRPM and perhaps you can build it on your box?

Configure isn't looking for libraries... it's just asking pkg-config if eventlog is installed and if the installed version is greater than the minimum required.

```
pkg-config --list-all | grep event
```

If it doesn't list eventlog, then you need to install it.

I am having problems building syslog-ng 2.0.6 on RHEL 5. I have installed the required eventlog libraries into /usr/local/event-0.2.5. However, configure is not finding the libraries and is also complaining about not finding pkg-config:

```
#!/configure --prefix=/usr/local/syslog-ng
<snip>
checking for GLIB... yes
checking for EVTLOG... no
configure: error: Cannot find eventlog version >= 0.2: is pkg-config
in path?
charger:/usr/local/src/syslog-ng-2.0.6 #which pkg-config
```

I have tried adding the /usr/local/eventlog-0.2.5/lib path to /etc/ld.so.conf (and reconfiguring ld).

```
charger:/usr/local/src/syslog-ng-2.0.6 #ldconfig -p | grep eventlog
libevtlog.so.0 (libc6) => /usr/local/eventlog-0.2.5/lib/
libevtlog.so.0
libevtlog.so (libc6) => /usr/local/eventlog-0.2.5/lib/
```

Re: Anyone using syslog-ng on RHEL 5?

libevtlog.so

I have tried defining this in LD\_LIBRARY\_PATH. I have also tried explicitly setting LDFLAGS (for the libs) and CPPFLAGS (for the includes) in the environment I'm running configure from. I am unable to get configure to find these libraries.

```
charger:/usr/local/src/syslog-ng-2.0.6 #which pkg-config
/usr/bin/pkg-config
```

```
charger:/usr/local/src/syslog-ng-2.0.6 #pkg-config --version
0.21
```

It also complains it can't find pkg-config, however pkg-config is under /usr/bin and the shell I'm running this from has no problems finding it:

```
charger:/usr/local/src/syslog-ng-2.0.6 #which pkg-config
/usr/bin/pkg-config
```

```
charger:/usr/local/src/syslog-ng-2.0.6 #pkg-config --version
0.21
```

Its probably a bonehead mistake I'm making but after 3 fresh looks at this it still eludes me.

Thanks for any help,  
CC
