Jason Staudenmayer wrote:

Last time I moved one I update at least 15 files.
 Are any services bound to an address or are they all set to 0.0.0.0
 Firewall rules need to updated if they are hard set.

15? I just did it a month ago, RHEL 4, and it was only two or three, under /etc/sysconfig. I think it was one of the network* scripts, and ifup-eth0
