Hi All,

I am New to RedHat Linux, I am Upgrading My self on Linux/Unix platform. I need some docs to configure Realtime Servers like NFS, NIS, FTP, Web Server, DNS, Mail Server etc.

Can any one guide me for step by step configuring all concepts available on Linux.

I even collected some documents but only theoretical info.

Can any one give me links to download practical lab oriented documents.

Thanks & Best Regards

Vishnu Vardhan Reddy
