Hello list,

I'm trying to update a RHEL 4es server via RH Satellite server.
Running up2date -u gives this result:

```
root@e11apvl028 ~]# up2date -u
```

Testing package set / solving RPM inter-dependencies...

There was a package dependency problem. The message was:

Unresolvable chain of dependencies:

```
firefox 1.5.0.12-15.el5_1 requires libc.so.6(GLIBC_2.4)
firefox 1.5.0.12-15.el5_1 requires libcairo.so.2
firefox 1.5.0.12-15.el5_1 requires libpangocairo-1.0.so.0
firefox 1.5.0.12-15.el5_1 requires libpng12.so.0(PNG12_0)
firefox-1.5.0.12-15.el5_1 requires nspr >= 4.6
firefox-1.5.0.12-15.el5_1 requires nss >= 3.11.1
gd 2.0.33-9.4.el5_1.1 requires libc.so.6(GLIBC_2.4)
gd 2.0.33-9.4.el5_1.1 requires libpng12.so.0(PNG12_0)
gd 2.0.33-9.4.el5_1.1 requires rtd(GNU_HASH)
gd-devel 2.0.33-9.4.el5_1.1 requires libX11-devel
gd-devel 2.0.33-9.4.el5_1.1 requires libXpm-devel
ghostscript 8.15.2-9.1.el5_1.1 requires libc.so.6(GLIBC_2.4)
ghostscript 8.15.2-9.1.el5_1.1 requires libpng12.so.0(PNG12_0)
ghostscript 8.15.2-9.1.el5_1.1 requires rtd(GNU_HASH)
gimp-print 4.2.7-2 requires libijs.so
speex 1.0.5-4.el5_1.1 requires libc.so.6(GLIBC_2.4)
speex 1.0.5-4.el5_1.1 requires rtd(GNU_HASH)
```

The following packages were added to your selection to satisfy dependencies:

Package Required by

Do you have any suggestions for how to solve this? I cannot understand that the dependencies mentioned are not satisfied, like libc.so.6, and why are they not just resolved automatically.

Thanks,

Erling
