Is anyone using the stock postgres on 8.2? If so is it bloody slow for you? We upgraded servers recently and went from a dual athlon mp 1.4ghz with 5 disk raid 5 to a dual xeon 2.4 with a 4disk raid 5. I have an insert that took about 2 minutes on the old server. It takes over 20 minutes now. Do I need to recompile postgres or something to get it up to speed?

ROb
