IIRR, this was happening to a lot of people, me included, and for the life of me I can't find the fix that worked. I think it had something to do with changing either the month of day format by hand. Try this...when you go to change the date, take out the '0' (zero) in the month or day part, so that it would look like this (DD-MM-YYYY) 5-08-2003 *or* 05-8-2003, then hit accept or okay or whatever it is and see if that works for you.
