To: suse-linux-e@suse.com

Hi,

Anyone knows what is the difference between Gimp-Print and stock SuSE cups-drivers-stp package? Looking into content of cups-drivers-stp, I found it is somewhat smaller than gimp-print.

Additionally, if anyone have installed gimp-print manually by means of compiling sources, which gimp-print branch you have used – development or stable?

Any feedback (incl. printer model, results, either positive or negative, and compilation options) is greatly appreciated.

Thanks in advance.
