

[SLE] "send only" with postfix

Source: <http://linux.derkeiler.com/Mailing-Lists/SuSE/2003-10/1328.html>

I've installed SuSE 8.2 with a program that requires /usr/lib/sendmail to send email.

So I have to start postfix on that machine. But it also starts SMTP – and I don't want that! Isn't it possible to just have let it send email?

Commenting out smtp from master.cf stops all outgoing email as well.
