This is not the way

I upgraded Gaim yesterday directly from their site

And I wrote in the list previously:

Reply Reply All Forward (Recover to Folder)InboxSent

Version

I am connected successfully with gaim to MSN

Just downloaded and installed:

gaim. 0.71
gtkspell 2.0.4
gtkspell devel 2.0.4

in the gaim site

<http://gaim.sourceforge.net/>

Read the FAQ You will find there all the links that you need to get Gaim
plenty functional

Thanks for the advice. Amsn works fine, but seems to be a one-protocol thing. The beauty of gaim is that you use one client for all protocols: msn, jabber, icq, aim, etc ...

There must be a way of getting gaim to work. It's probably something with the SSL libraries.

Thanks anyway.
