Hi all,...

I configured (added) manually my PixelView Pro Ultra using yast2. However, i can't use it with any TV apps. When i run kwintv using konsole, it said:

can't open /dev/video0: No such device

My suse 8.2 detected my card though. I can see the card from the "Hardware Information" on yast2. Did i miss something?

Please help,

Adinda Praditya
