To: suse-linux-e@suse.com

To Charles Phillip Chan: Followed your instructions, and found my printer had already been installed using your method. That being the case, I am back to square one, because it still prints off to the right with no word wrap and 2 to 3 inches in from the left. Now, that should get the accusers of whining off my back, this printer and SuSe 8.2 nor ver.9 will work together. If there is something wrong it is with Suse, as I use the same printer with OpenOffice 1.1 in Windows, successfully!
