To: Suse Discussion List <suse-linux-e@suse.com>

has anyone found a php-gtk that works with suse (any suse version over 7.1 will do ;)) ...

I tried installing from source on a 7.3 box, but got lost in dependecy hell

.

The exact php-version (forgot which) that is required was not available, so I installed the latest php, but that one again has slight differences and things break again ...

Currently listening to: gen1973-12-19d1t3

```
__O This is a 32-storey block combining classical neo-Georgian features
=\<<, with the efficiency of modern techniques. The tenants arrive here
(=)/(=) and are carried along the corridor on a conveyor belt in extreme
comfort, past murals depicting Mediterranean scenes, towards the
rotating knives.
```
