Hi Folks,

(thanks for all the hardware recommendations)

My DVD-player plays CDs. Playing DVDs it locks-up and I cannot open the drive bay. I installed the latest xine build. I suppose xine is the only thing that will work. I did install all multimedia packages from professional initially and I did not uninstall anything including old crippled xine. Should I remove all multimedia: sound and start from scratch?

Very stupid me: returned the Pioneer DVD-Rom player thinking it was the culprit. I left my SuSE 9.0 Pro DVD in it. I have to get it today before some poor Windows users installs it from the discount bin.

Happy Halloween!

Thom Nuzum
