Hi,

I'm planning to install 9.0 professional (currently on 8.1) and to replace my ps2 mouse with a Logitech Cordless Optical mouse (usb connection). I'm a bit apprehensive, because I had a few mouse problems in 8.1 and had to tweak my XF86Config file to get the mouse to work properly.

Has anyone had success using a Logitech Cordless Optical usb mouse? If so, would you mind sharing the mouse section ("InputDevice") of your XF86Config file? Thanks very much for your help!

Dom
