New/updated on [www.usr-local-bin.org](http://www.usr-local-bin.org) today:

- \* The GIMP – The GNU Image Manipulation Program
  - Packages return to the site
  - Version 1.3.21
  - Python plugin included
  - As per SuSE 9.0 default, can be installed alongside the 1.2.x package
- \* GTK+ – The GIMP Tool Kit, used by GNOME
  - Part of the Misc Stuff section
  - Packages return to the site
  - Version 2.2.4
  - Include drop-shadow patch
- \* control-center2
  - Part of the Misc Stuff section
  - The packages previously on the site included a very broken theme manager – I had uploaded the wrong ones on Monday. This is now fixed. All users are recommended to upgrade

James
