I am trying to test to see if a file exists but the extension changes all the time, ie

ab251455.001

ab251455.002

if I do a :

```
if [ -e /var/max/spool/inbound/ab251455.* ] ; then
```

```
    run_command
```

```
fi
```

the run_command never runs

Sean
