To: SuSe Mailing List <suse-linux-e@suse.com>

Date: Sun, 30 Nov 2003 18:08:48 +0000

Or similar is the message I get if I do (as root):

```
/usr/sbin/ippd /dev/ipp0 user nolimits name nolimits noipdefault netmask \  
255.255.255.255 defaultroute ms-get-dns ippd-accept-local  
ippd-accept-remote
```

I need to start ippd to connect to the net from a script but it says it cannot, would love to know how I am connected :0-

Sean
