Hi All,

I boo boo.

I edited the GRUB conf file in YaST and now it won't work. I tinkered and tinkered but finally just did a fixmbr with mt XP CD so I could boot to something.

I tried booting to the SuSE fix but didn't know enough about Linux commands to do what I wanted.

Before I did any tinkering it booted to a grub prompt:

GRUB>

Tried many things here but no good.

I even booted with Knoppix 3.3 and found the file I think I needed to fix but it wouldn't allow me to. Didn't have permission.

Anyway, I want SuSE back ..... Help

Thanks

Russ
