Hi,

In addition to kopete, "amsn" is a nice MS Messenger client for Linux and other OSes. It is Tck/Tcl based. Is nice enough to permit my child to convert to Linux :-). Is a good help to get Linux users that cannot be without Messenger.

I've build rpms for SuSE 8.2 and 9.0. It has good KDE3 integration. You can download it from (slow home server)

http://www.oxixares.com/rpms/SuSE_8.2/

http://www.oxixares.com/rpms/SuSE_9.0/

Binaries RPM are the 'noarch.rpm' ones.

You can read more about it at Sourceforge:

<http://amsn.sf.net/>

Finally, Happy new year 2004.

Guillermo
