I am trying to get Sync to work with my Kyocera 6035 cellphone/PDA via a USB-Serial adapter from sewelldev.com

All of the USB ports seem to be set up OK as I tried
mknod /dev/usb/ttyUSBx x 188 x on 1 through 10 and was informed that they were already present.

Sync is looking for dev/pilot so I tried
symlink /dev/usb/ttyUSB4 /dev/pilot and discovered that symlink doesn't exist.

How please, do I make this happen?

Thanks! doc
