To: Suse <[suse-linux-e@suse.com](mailto:suse-linux-e@suse.com)>

I thought I have solved it, but ....

I have added all modules to `/etc/sysconfig/apache2` to use `%0`, but it does not help.

I moved back to SuSE suggestion including `vhost_alias`.

I have made according the `./vhosts.d/vhost.template` some copies of my domains. (only replacing `dummy-host.example.com` with my website names and saved the file with the name of the web site followed by ".conf"

First only three and restarted apache2:

All sites show only one site, independent how I call it out of the three `site.conf` files

I added two more and get than during startup a message:

... [warn] `_default_ VirtualHost` overlap on port 80, the first has precedence

Any hints please! I am exhausted!

bye

Ronald
