Hi everyone,

I just started out with upgrading my kernel, i have A7N266 motherboard with onboard lan, so it is a big pain to install it, nothing worked and i had to use forcedeth, and now the eth0 starts alright, but the system isnt booting completely to the login, any help????

Humor is the only test of gravity, and gravity of humor; for a subject which will not bear raillery is suspicious, and a jest which will not bear serious examination is false wit.
