Hi,

Sometime, kopete 0.8 (included in SUSE's kdenetwork3-3.2 binary) crashes when closing a chat window (MSN or Yahoo chat window). Has anybody who use self-compiling KDE 3.2 experienced the same?

Here's the error message:

```
libkopete: WARNING: [virtual KopetePluginManager::~KopetePluginManager()]
Destructing
plugin manager without going through the shutdown process!
