To: suse-linux-e@suse.com

I moved a SuSE 9 Pro formatted and loaded HDD to a newly assembled PC.

ASUS A7V8X-X Rev 1.xx w/256m RAM, etc.

No matter how I try to get at it, Default, Failsafe, and all the other Linux boot menu options under SuSE I get this error:

"Kernel Panic VFS Unable to mount root fs on 03:43"

I can live without the old contents of the HDD if it is necessary. to format the thing.

What's the concensus, please?
