Hi there

I have a problem in my OS suse 7.3 to upgrade the KDE to any one from KDE 3.0 and above, so I tried install RPM archive to suse but I have error so I don't know how to do it and you can see the picture below and see the problem, I heard there is trick and then you can install. so if anyone has a solution I hope tell me.  
thanks in advanced.

the picture in this two links just press and you will see it.
