I installed SuSE linux 9.0 with gnome. There is a main menu at the bottom of the desktop (green looking icon). How does one set about modifying the entries inside that main menu? The reason I ask is because I would like to change the categorization of some icons and create new folders in the menu for some other applications.

Thanks in advance for any help,

--Moby

They that can give up essential liberty to obtain a little temporary safety deserve neither liberty nor safety.  
First they came for the Jews and I did not speak out because I was not a Jew.

Then they came for the Communists and I did not speak out because I was not a Communist.

Then they came for the trade unionists and I did not speak out because I was not a trade unionist.

Then they came for me and there was no one left to speak out for me. -- Pastor Martin Niemöller
