Hi,

Below is the configuration of my CVS

```
/etc/xinetd.d/cvs
```

```
service cvspserver
```

```
{  
    disable = no  
  
    socket_type = stream  
  
    protocol = tcp  
  
    wait = no  
  
    user = cvs  
  
    server = /usr/bin/cvs  
  
    server_args = -f --allow-root=/var/cvsroot pserver  
}
```

Suse Linux 2.4.20-64GB-SMP #1 SMP Sat Feb 7 02:07:52 UTC 2004 i686 unknown
unknown GNU/Linux

[SLE] CVS connection refused

SuSE: [SLE] CVS connection refused

`/var/cvsroot/CVSROOT/passwd` (created by `/usr/sbin/htpasswd`)

`myusername:KjsaTw4EW0MQM:cvs`

`export CVSROOT=:pserver:myusername@10.10.10.2:/var/cvsroot`

`export EDITOR=vi`

–restart the server

–run command `'netstat -a |grep LISTEN'` but cannot find any `cvspserv` or port 2401

– try with `cvs login` enter the password

`myusername@tux:/var/cvsroot/CVSROOT> cvs login`

(Logging in to `myusername@10.10.10.2`)

CVS password:

`cvs [login aborted]: connect to 10.10.10.2:2401 failed: Connection refused`

PLEASE HELP!

SuSE: [SLE] CVS connection refused

Thanks in advanced

– Jason Lim
