I have a PCI softmodem, Creatix Polymedia V.9x DSP Dara Fax Modem.

Under SUSE8.1 I could install the Intel driver, under 9.1 while trying to configure this modem through YAST2, YAST comes back with the message:

These Packages need to be installed:

Intel-536ep

After hitting the continue button, a new message pops up:

The required packages are not installed. The configuration will be aborted.

Try Again?

Well, trying again brings me back to the first error message.

Anybody any suggestions?
