I want to use HP Compaq t5500 NC (thin client computer) to run the client with my SuSE Linux server (standard install) as the Terminal Server. Is this possible, has anyone done it or does anyone have any notes.

They talk of diskless workstations on the website (<http://www.ltsp.org>) and they also mention HP launching major support using amongst others the t5500 diskless workstation (NC??).

Any help would be greatly appreciated.

JH
