Dear Egidio

I'm not sure if this will help but I had the same type of problem, i.e.: incorrect monitor settings. If you can get to a command line / terminal:

```
su to root
```

```
init 3 to set runlevel to 3
```

```
sax2 should load Sax2 for you so you can
```

```
change the settings. I think this might help.
```

NOTE: Sax2 has to run at runlevel 3.

Cheers,

Mike
