When I installed SUSE 9.1 (which I haven't upgraded yet) I also installed Netscape 7.1 as my network browser and mailer. It's ok .. The only feature that I cannot get to work is to store bookmarks. I can bookmark the currently shown page... But when I restart Netscape after exiting it ... well ... all the bookmarks are gone ! This did not happen with Netscape 6.0 ...

I've also installed the last StarOffice version that is actually the same as the current OpenOffice tool coming with SuSE 9.1 I'm using StarOffice for writing a paper. Unluckily everyone else in the team I belong to uses Windows. Therefore I've been requested a MS-WORD compatible paper for revision on part of other people. Does anyone know whether there is an output file format supported by StarOffice and/or OpenOffice that is readable by MS-Word ?

Thank you in advance for your help.
