To: SLE <suse-linux-e@suse.com>

I have a 9.0 system where I have edited the K menu.

Which file do I need to delete to restore the menu to its default install ie as it was before I edited it?

I do not want to change my background and screensaver settings, just the K 'menu' settings I thought I'd like, but consequently don't.

Along the same lines, If I restore a 9.0 /home backup into a 9.2 system will the same 'K' menu file also need to be deleted so that it can recreate itself, otherwise surely I would lose the new items added into 9.2?
