To: SLE <suse-linux-e@suse.com>

How can I change the function of depressing the 'Shift+TAB' keys ie I do not want it to switch desktops but to rather go to the previous field in the KDE GUI?

I have looked in the help and been through both Yast and the Control Centre and can't find the setting that allows me to change the keyboard behaviour from switching desktops to going back to the previous field.

This is driving me nuts as I know it is there somewhere.
