Hi,

Wanted some/any recommendations for the following network:

25 or so XP and 2000 Clients.

3 or 4 wireless clients running XP.

Want to configure Suse Linux Enterprise 9 running Samba w/ LDAP backend.

1. What kind of Anti-virus software is recommended?
2. what email service should be used? Postfix or Sendmail?

Any other recommendations/suggestions, configuration ideas, are welcome.

Scott
