I am getting this message every few seconds, which I think is due to my WinTV-Go + FM card. I cannot configure this card for use in SuSE as yet but this message is bugging me:

```
an 30 21:20:41 sean kernel: cx88[0]/0: AUD_STATUS: 0x1d32 [mono/no
pilot] ctl=BTSC_AUTO_STEREO
```

Anyone know what I can do or should I contact support?

Sean
