I recently upgraded my suse linux 9.1 to suse 9.2, then I can't see the palm pilot in the /dev/ttyUSB1. Searching via google I try to modify the udev rules, and to use this row:

```
#PALM PILOT
```

```
SYSFS{product}="Palm Handheld", NAME="pilot_any"
```

But I continue to don't see the palm, can anyone help me?
