Whenever I access a mounted cifs share in Konqueror, Konqueror crashes. This worked fine in 9.1, and Windows 200 smbfs shares are fine. Any ideas?

SUSE 9.2

extract (names & pwds changed) from /etc/fstab:

```
\\ServerA\sharea /home/user/Documents cifs
rw,uid=user,gid=users,username=user,password=passwd 0 0
\\ServerB\shareb /mnt/shareb smbfs
rw,uid=user,gid=users,username=user,password=passwd 0 0
```
