Just installed Suse 9.2 on above board, everything works except the mouse cursor. I move the mouse around and see the icons highlight on the desktop, but there is no mouse cursor. Mouse portion of XF86Config is below.

Section "InputDevice"

Driver "mouse"

Identifier "Mouse[1]"

Option "Buttons" "5"

Option "Device" "/dev/input/mice"

Option "Name" "ImPS/2 Generic Wheel Mouse"

Option "Protocol" "explorerps/2"

Option "Vendor" "Sysp"

Option "ZAxisMapping" "4 5"

EndSection

This is the same as on my old dell dimension. Any ideas why just the cursor does not show up?
