To: suse-linux-e@suse.com

I am trying to install/use an application that access mysql using apache2/php/pear.
SuSE 9.2.

When php/pear try to access mysql, only a line with command
mysql://asteriskuser:xxxxx@localhost/asterisk
is displayed on a blank screen on the browser as a result.

It seems to me that a link between apache2/php and mysql is missing.
Any hint?
