When I try to boot my 9.2 system from the 9.2 Live CD on LSI21002 (sym53c8xx), it fails with:

cdrom: open failed

init: Cannot find the CD I was booted from – doh !

Kernel panic – not syncing: Attempted to kill init!

Does anyone know if the 9.2 live CD can be made to boot from LSI SCSI CD with some optional kernel parameter? I know the CD is OK, because it boots other systems with IDE CD.

The Knoppix CD has a similar boot failure problem, unable to find its own filesystem. Does anyone know if some optional kernel parameter can make it boot properly?
