hi all,

1.Can anyone suggest a repository for MPlayer for SuSE 9.1?

2.How do I play .dat files? Most of the videos that I want to play are in this format.

3.Whenever I try to open an mpg video file with noatun, xine, or kaffeine, I just get a blank screen and only the audio plays. But if I have Xine running in the background and I also have Kaffeine running and play the .mpg file in Kaffeine, the clip plays. Can anyone suggest what's happening? Kindly let me know how I can play the .mpg movies properly. I meddled with all the menus in Xine and Kaffeine, but in vain.

Thanks for your time and help.

bye.

chaitanya.
